WORK EXPERIENCE

Software Developer - Infomaze Elite Private Ltd

Mar 2022 - Present

- Developed and enhanced web application features, including a comprehensive planning tool to streamline user workflows and improve operational efficiency.
- Wrote clean, maintainable, and optimized code while actively participating in code reviews to maintain high-quality development standards.
- Managed team workflow coordination and testing activities, ensuring timely delivery and smooth project execution.

PROJECT EXECUTION

IMPLANT MEDIA

- Engineered a complete e-commerce print service platform supporting end-to-end ordering, dynamic pricing, and multi-category product management.

DRAPE KINGS

- Developed a quotation and payment management system enabling secure quote approval and online payment processing.
- Built an admin dashboard for managing customers, users, and payments.

LOOMING

- Built a barcode-based inventory and order management system for automated product tracking and lifecycle management.
- Delivered a full-featured admin dashboard with CRM, product, user, and reporting modules.

TRADING

- Developed a semi-automated trade management web application using CodeIgniter and MySQL.
- Improved client account handling, order execution, and trade tracking efficiency.
- Designed a responsive, data-driven interface with advanced search, filters, pagination, and export tools.

APEX

- Integrated real-time trading order APIs for seamless order placement, execution, and monitoring.
- Designed and optimized PostgreSQL databases for fast and reliable data processing and retrieval.

EDUCATION

Bachelor of Computer Applications (BCA)

B.G.S First Grade College, Mysore

Percentage: 68.28% | Graduation: September 2020
